

SAKSHAM AGRAWAL

B.Tech CSE (Hons.) – AI & Data Analytics | GLA University, Mathura | 2025–2029

saksham91108@gmail.com | +91-9456272102 | Agra, Uttar Pradesh, India

linkedin.com/in/saksham-agarwal91108 | github.com/saksham91108 | HackerRank: 5-Star Gold (Python)

SUMMARY

Second-year CS student at GLA University (AI & Data Analytics, with Intel and NEC) and full-stack developer with FastAPI, MongoDB, and React, who shipped a production-quality expense-splitting app with a 130+ test suite. Active open-source contributor (GSSoC '26) seeking SDE opportunities.

EDUCATION

B.Tech – CSE (Hons.), AI & Data Analytics | GLA University, Mathura
Specialization in collaboration with Intel and NEC

2025 – 2029

Class XII – CBSE (PCM) | **Class X – CBSE** | CBSE Board

2025 / 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend & Data: FastAPI, MongoDB, JWT Auth, REST APIs, Async Programming, pytest

Frontend: React, React Native/Expo, Vite, Tailwind CSS, Zustand

Tools & Platforms: Git, GitHub, Groq API, Azure (Fundamentals-certified)

PROJECTS

SplitGreen — Full-Stack Expense-Splitting App | Team Project (4-person) — Completed

2026

Stack: Python · FastAPI · MongoDB · React · React Native/Expo · Groq API · JWT

- Led backend development end-to-end: shipped 14+ features including OAuth, SSE notifications, group messaging, CSV export, pagination, and rate limiting.
- Audited 23 backend files and fixed 11 critical bugs (JWT blacklisting, settlement crashes, N+1 queries, blocking SMTP, date-arithmetic errors); built a 130+ test pytest suite with mongomock-motor.
- Delivered a polished React web app (dark/light mode, global currency) and a native mobile app, plus AI-powered receipt scanning (Tesseract.js OCR + Groq AI).

Career-AI — Resume Intelligence Platform | Personal Project

2025

Stack: Python · FastAPI · MongoDB · React · Vite · TypeScript · Groq API · JWT

- Built a full-stack platform delivering AI-powered resume feedback, skill matching, and career Q&A.
- Designed a RESTful FastAPI/MongoDB backend with Groq API integration, JWT authentication, resume parsing, and job-role matching.

OPEN-SOURCE CONTRIBUTIONS

GSSoC '26 Contributor | GirlScript Summer of Code

2026

- NexaSphere: fixed a DELETE-request body-validation bug caused by reverse-proxy stripping; resolved DCO sign-off for merge.
- DoubtDesk: implemented a student toolkit sidebar, CTA polish, and HTML validity/accessibility fixes.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals — Microsoft (May 2026)
- AI Algorithm Development with Python: Essentials & Implementation — Intel Unnati Lab (Oct 2025)
- AI Mastery: Unlocking the Power of Artificial Intelligence — NEC Corporation (Oct 2025)
- Python (Basic) — HackerRank (Nov 2025)
- Python Developer — SoloLearn (Nov 2025)
- Basics of Python — Infosys Springboard (Nov 2025)

ACHIEVEMENTS & ACTIVITIES

- HackerRank – 5-Star Gold Badge in Python
- Solved 100+ problems on LeetCode
- Pre-Screening CTF, EscalateX V2 — GLA University
- BuggedOut 2025 (Competitive Programming Challenge) — AWS Cloud Club, GGSIPU
- One Shot, One Line — Innovision '25, Netaji Subhas University of Technology (Nov 2025)
- Preliminary Case Submission, CaseForge 2025 — IIT Kharagpur
- Behind the Code: session with an Amazon SDE II — GDG GLAU
